Track Roller

21N-30-00120

Main specification parameter for Track Roller

Brand	Model	Product Name	Part Number
Komatsu	PC1250	Track Roller	21N-30-00120

Compatible Equipment Models: PC1250-8

We are committed to providing a variety of parts including bulldozers, excavators and wheel loaders for well-known brands such as Carter and Komatsu. Our product line covers a full range of OEM parts, such asTrack Chain, Track Rollers, Sprocket, Excavator Buckets, Blades, Excavator Cylinders, Swing Circles, and various electrical and hydraulic components to ensure that our customers' stringent requirements for quality and performance are met.

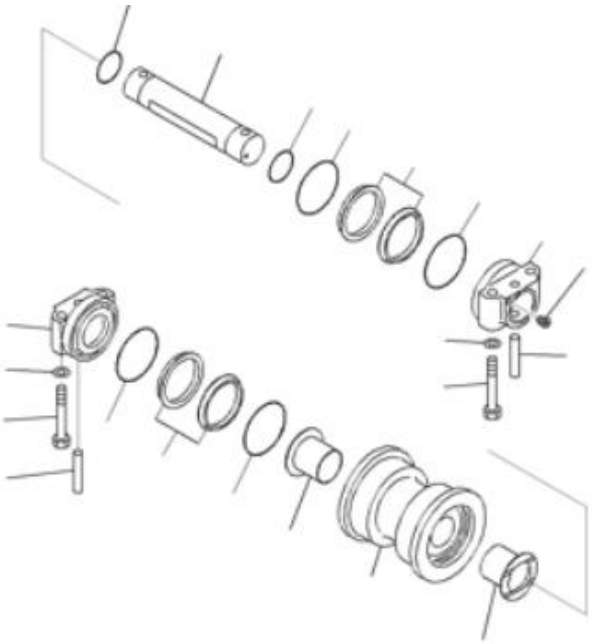

Stone (Shanghai) Engineering Machinery Co., Ltd. is a leading supplier of engineering machinery parts, focusing on providing high-quality parts for mining companies. Since its establishment in 2004, we have been based in Shanghai, China, and have built our own brand STONE, becoming a trusted choice in the industry.

Track Roller

21N-30-00120

Product Detail

Product Name	Track Roller
Part Number	21N-30-00120
Origin	Japan
Brand Name	STONE
Model	PC1250-8
Price	Negotiable
Packing Details	Standard Export Packing
Delivery Time	0-30 Days
Payment Term	L/C, T/T
Price Term	FOB, CIF, CFR
Supply Capacity	50,000 PCS/Month
Minimum Order Quantity	1 PC
Material	High Quality Steel
Technology	Precision Machining
Surface	Treatment Anti-Corrosion Coating
Hardness	HRC 48-52
Quality	Original Factory Standard
After-Sales Service	Full Support, Online Service
Color	Customizable
Application	Excavator
Customizable	including customized materials, surface treatment and specifications

Address:No. 348 Huajiang Road, Room 221, Shenyao Art Center, Jiading District, Shanghai

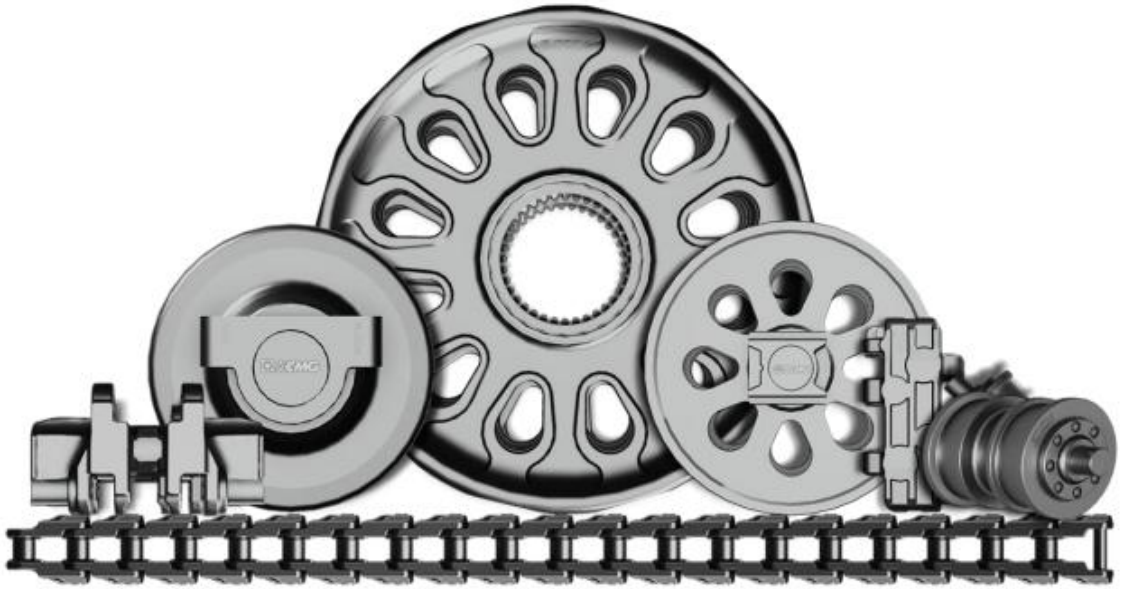

About Us

STONE is a professional company focusing on mining equipment parts, providing customers with one-stop solutions for mining parts including R&D, supply and technical services. Our company has its own brand STONE and has established a professional R&D and service team of more than 30 people.Our core team has been deeply involved in the construction machinery industry for more than 20 years.

At STONE, we are committed to our mission:
Building The World Together!

Forward Design

We implement forward design and establish strict standards for raw materials, key components and process technology.

All series, All working conditions, All weather . Large-tonnage, Complete-set, Tailor-made

1000+ CRAWLER ASSEMBLY

We jointly develop special steel with well-known steel mills combined with induction quenching of the chain link tread and the inside and outside of pin bush, which significantly improve product wear resistance and adaptability to working conditions.

All series, All working conditions, All weather . Large-tonnage, Complete-set, Tailor-made

500+ TRACK ROLLER

The wheel body that has undergone overall hardening treatment and the floating seal verified by limit tests ensure the reliability of products under harsh working conditions such as mining and heavy loads.

All series, All working conditions, All weather . Large-tonnage, Complete-set, Tailor-made

200+ CARRIER ROLLER

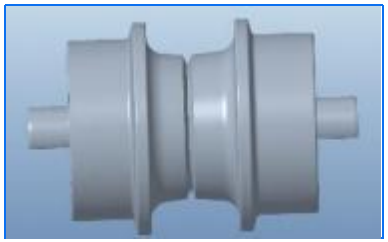

By applying anti-jamming and anti-loosening technology, advanced heat treatment technology, and a circulating structure of lubricating medium on the inner wall of the bearing, the service life of the carrier roller is greatly extended.

360 + IDLER

The wheel body is cast or forged as a whole, to have good fatigue resistance. At the same time, high-strength sliding bearings and sealing technology are used to improve the adaptability of products under extreme working conditions.

400+ SPROCKET

Based on the host operating conditions, design conventional teeth, continuous teeth, staggered teeth and other driving structures, we develop high alloy structural materials and heat treatment processes, achieve high-temperature reinforcement and low-temperature toughening, significantly improve product strength and wear resistance.
